

Ken

Full-Stack Developer & Security Researcher

keni@kenibuildstuff.com

kenibuildstuff.com

github.com/streetprogrammer101

Nigeria · Remote worldwide

PROFILE

Full-stack developer and security researcher building since 2020. I ship complete systems — **AI platforms, SaaS products, and the production infrastructure underneath them** — and I break things (ethically) as an active bug bounty hunter. Available for full-time remote roles and contracts, worldwide.

20+ projects shipped **3** bounty platforms **\$25/hr** freelance **24/7** infra uptime

SELECTED PROJECTS

PredictMonkey.online

LIVE

AI prediction platform with a custom "MonkeyMind AI" cron engine generating and cycling predictions every minute — runs unattended in production; 100+ lead outreach pipeline staged.

Laravel · SQLite · Inertia.js · AI/ML

Autonomous AI Assistant

IN PRODUCTION

Autonomous assistant on my own infrastructure: administers a production mail stack (Exim/Dovecot, DKIM signing), sends verified mail, keeps persistent memory, runs daily briefings, maintains an 11-check email regression suite.

Python · SMTP/IMAP · Linux · Automation

Client: ByMyHonor

CLIENT · ACTIVE

Digital platform for employee handbook and company content — content management, onboarding flows, publishing workflow. Delivered end-to-end, engagement ongoing.

Full-stack · Content Platform

Client: Gym Management Platform

CLIENT · ACTIVE

Member management and class scheduling on Laravel with a mobile client for self-service check-ins and bookings. In active use by the client's business.

Laravel · Mobile Client

FB Scraper Pro

TOOL

Facebook intelligence platform — 13K+ lines, 9 target types, 12 analysis modules, lead scoring and intent detection.

Python · Playwright · Flask

AI agent orchestration — multi-provider brain, voice input, screen control, persistent memory.

Python • Groq API • Edge TTS

Eight-chapter practical guide to deploying AI in small businesses: tools, costs, and workflows that survive patchy connectivity.

SECURITY

Active bug bounty hunter on **HackerOne, Bugcrowd, and Intigriti** — programs include Adobe, Coveo, NVIDIA, and Vercel Sandbox. Web application security, penetration testing, and report writing.

TECHNICAL SKILLS

Laravel / PHP	Expert	Tailwind CSS / Inertia.js	Expert / Advanced
Python	Advanced	Web App Security	Expert
Node.js	Advanced	Penetration Testing	Advanced
SQLite	Expert	Linux Admin / Email Systems	Advanced
PostgreSQL / MariaDB	Advanced	Docker / Nginx	Advanced
React / Next.js	Advanced	TypeScript / CI/CD	Intermediate

ENGAGEMENTS

- Independent freelance & contract development — remote, worldwide (ongoing)
- Server & infrastructure operations: AlmaLinux, Nginx, Exim/Dovecot mail, Docker, Ollama, PM2 — production, 24/7
- Writing: *AI for African SMEs* — publishing September 2026

References and project walkthroughs available on request.
